

Company Profile

HIIDIK

"From Local Resources to Global Markets"

About HIIDIK

Indonesia grows and processes an enormous range of food ingredients, but quality and reliability vary widely between regions and seasons. Buyers abroad often struggle to tell the difference from a product listing alone.

HIIDIK

AN EXPORT HOUSE BUILT ON WHERE THINGS COME FROM

Hiidik sits in that gap. We select products from established growing regions, check them through grading and packing, and present them plainly to the people who will import them — so the decision to buy is based on what actually ships.

Hiidik

Vision & Mission

Vision

“To become a trusted Indonesian company delivering quality and value-added products from local resources to national and global markets.

Mission

- Deliver quality products
- Open Indonesian products to global markets
- Build mutually beneficial partnerships

Hiidik *Product*

01. **BIHUN JAGUNG**
Corn Vermicelli

02. **SAGU MUTIARA**
Pearl Sago

03. **GULA SEMUT AREN**
Granulated Palm Sugar

04. **REMPAH-REMPAH**
Spices & Jamu Herbs

Indonesian Food Ingredients

www.hiidik.com

01.

BIHUN JAGUNG
Corn Vermicelli

Vermicelli milled from Indonesian corn. Neutral in flavour with a firm, non-sticky bite, it holds its structure in soups, salads and stir-fries and rehydrates quickly. A staple carbohydrate for markets seeking a wheat-free noodle.

Best for
Soups, stir-fries, ready meals, food service

Packaging
Retail packs or bulk cartons, specified per order

02.

SAGU MUTIARA
Pearl Sago

Small round pearls pressed from sago palm starch. They cook to a glassy, springy texture and take on colour and flavour well, which makes them a fixture in desserts, puddings, porridges and bubble-tea drinks.

Best for
Desserts, puddings, bubble-tea, dessert manufacturing

Packaging
Retail packs or bulk sacks, specified per order

03.

GULA SEMUT AREN
Granulated Palm Sugar

Free-flowing sugar crystallised from fresh aren (sugar palm) sap. It carries deep caramel and molasses notes, dissolves quickly in hot and cold liquids, and works as a one-to-one unrefined alternative to cane sugar in baking, beverages and sauces.

Best for
Bakery, beverages, sauces, natural-sweetener lines

Packaging
Retail pouches or bulk sacks, specified per order

04.

REMPAH-REMPAH
Spices & Jamu Herbs

Sixteen rempah and jamu herbs confirmed for export — whole roots and rhizomes alongside milled powders, cleaned and graded to order.

Other jamu roots, custom blends and private-label packaging also available on request.

Sixteen Rempah and Jamu Herbs

HIIDIK

REMPAH-REMPAH
Spices & Jamu Herbs

Secang (Kayu Sappan)

Lempuyang Bubuk (Bubuk)

Jahe Merah Bubuk (Bubuk Jahe Merah)

Kunir Bubuk (Bubuk Kunyit)

Custom Sourcing

BEYOND THE CATALOG

Our catalog is the starting point, not the limit. If you need another Indonesian food ingredient in commercial volume, send us the specification and destination market and we will tell you what is realistic on quality, timing and price.

From Source to Shipment

ENQUIRY
Message us on WhatsApp with the product, volume and destination market.

SAMPLES & QUOTE
We send specifications, a sample where needed, and a quotation with incoterms.

PREPARATION
Product is graded, packed and labelled to the agreed specification and market.

SHIPMENT
Export documentation is arranged and the order ships to your nominated port.

Hiidik *Quality*

Every product we ship starts in an established Indonesian growing region and is selected for consistency, cleanliness and export readiness.

ROOTED IN PROVENANCE

We work with recognised growing and processing regions across the archipelago, chosen for the crop rather than for convenience.

SELECTED FOR CONSISTENCY

Grading, drying and packing are checked batch by batch so what arrives at your port matches the sample you approved.

READY FOR EXPORT

Packaging, labelling and documentation are arranged around your destination market and shipping schedule.
